SUMMARY

I am a programmer with a deep passion for computers and computing. I have extensive knowledge in various high-level programming languages, especially Python, where I am proficient in Object-Oriented Programming, Exception Handling, and Flow Control. My typing speed ranges between 70-85 WPM.

I have completed various courses at Infotep, including those related to Office tools like PowerPoint, Word, Excel, and Access. Currently, I am expanding my knowledge in Cyber-Security and Microsoft Projects. My approach to learning is enthusiastic and efficient, making me a quick learner.

In the realm of Cyber-Security, I have foundational knowledge and practical experience. This includes Offensive Security, where I successfully hacked an application in a safe virtual environment, and Defensive Security, where I protected against a live cyber attack, again in a controlled virtual setting.

Additionally, I work as a Research Assistant in collaboration with MESCYT and UNPHU. In this role, I have been contributing for over a year as a Python developer, engaging in various research projects and applying my diverse skill set to support innovative endeavors in the industry.

EDUCATION

High School Diploma, Computer Technology/Computer Systems Technology

Universidad Nacional Pedro Henríquez Ureña

01/2021 - 12/2025

PROJECTS

AI Gamification Python

01/2023 - Present UNPHU

I've been developing an app with Python.

TutorConnect – Plataforma de Tutorías Universitarias

2024 - 2025 UNPHU

Plataforma web para solicitud y gestión de tutorías, desarrollada con Django (Python), HTML, CSS y JavaScript. Diseño responsivo, estructura modular y flujos de usuario optimizados para múltiples roles (tutor / estudiante).

KEY ACHIEVEMENTS

Website Load Speed Enhancement

Enhanced website load speed by 60% implementing a new sticky menu and light/dark modes.

AWS Cost Optimization

Optimized AWS infrastructure, reducing operational costs by 25% for BuenoHotel.

EXPERIENCE

Network Monitoring Analyst

Red Nuevos Servicios Financieros, S.A. (MiRed)

12/2024 - Present

Santo Domingo, Dominican Republic

Responsible for overseeing financial transactions to ensure their proper execution and approval by banking institutions, adhering to high standards of quality and security. Tasked with maintaining a stable and optimal technological infrastructure to guarantee the availability and continuous performance of real-time systems. Provides swift and effective solutions to incidents, collaborating with internal and external teams to optimize critical processes and minimize operational risks.

Full-Stack Web Developer (Frontend/Backend) on AWS for BuenoHotel (Remote)

BuenoHotel

06/2025 - Present Dominican Republic

Full-Stack Web Developer on AWS for BuenoHotel

- Responsible for designing and deploying AWS infrastructure (S3, CloudFront) for Booking, Events, and Tours
- Build responsive React and Tailwind CSS UIs with 'My Reservations' and a WhatsApp link
- Optimize navigation with a sticky menu and light/dark modes to improve load times by 60%
- Automate CI/CD pipelines using AWS CodePipeline

Web Developer & Maintenance Specialist (Remote)

Palaeli Studio

07/2025 - 03/2026 United States

WordPress Web Developer at Palaeli Studio, building and maintaining custom websites tailored to creative and business needs, with a focus on performance and reliability.

Research Assistant (Remote)

Universidad Nacional Pedro Henríquez Ureña

01/2023 - 07/2025

I've been working as a Research Assistant and learned a lot since I've been developing an app in collaboration with UNPHU and MESCYT.
